Prediction and Confirmed Instruction

A confident guess still needs the completed instruction.

A learner's prediction may expose a question without becoming the group's direction.

Hypothetical example: an athlete guesses yesterday's waiting location, and the coach confirms today's location before inviting the child's explanation.

01 Recognize what the child called out

Identify the called-out prediction and its status.

What the athlete predicted

Instruction or concern still missing

Why an immediate response is needed

02 Keep the demonstration's instruction clear

Preserve or clarify the current demonstration.

Current explanation to preserve

Point requiring clarification

Direction the group may act on

Prediction and Confirmed Instruction / Review & follow-through

03 Examine the prediction after the needed explanation

Compare the prediction with the taught direction.

Information behind the guess

Part confirmed or corrected

Useful contribution actually observed

04 Teach a usable way to offer the next idea

Set a usable speaking arrangement for next time.

Ordinary question point or signal

Concern route to preserve

Coach invitation to make consistent
