Peer Help Scope and Handoff

Helping a teammate includes knowing when to ask the coach.

Peer service should clarify the task while leaving adult responsibilities with adults.

Hypothetical example: an athlete points to the assigned equipment box, then asks the coach when teammates describe two different directions.

01 Name the kind of help you are asking for

Name the approved ordinary help.

Permitted peer help

Task needing adult teaching

Responsibility the helper does not own

02 Repeat the current direction without adding a new lesson

Record the current instruction the helper may repeat.

Coach's actual instruction

Words the helper can use

Uncertain detail to avoid inventing

Peer Help Scope and Handoff / Review & follow-through

03 Offer help without taking ownership of the other child

Check whether help is wanted and appropriate.

Teammate's actual request

Response to unwanted help

Conduct the adult should observe

04 Teach the handoff when the question exceeds the role

Hand unresolved questions to the coach.

Question exceeding the peer role

Responsible adult route
