Two Cues and Current Task

Compare the settings before choosing a version.

The learner should ask a precise context question; responsible coaches resolve the instruction.

Hypothetical example: an athlete compares two waiting-location cues from different activities and records the coach's explanation of which applies now.

01 Put each cue back in its setting

Record each cue with its actual task and time.

First cue and its setting

Second cue and its setting

Word or condition remembered uncertainly

02 Ask which instruction belongs to the current task

Ask the responsible coach which direction applies now.

Current assigned task

Precise comparison question

Coach responsible for the explanation

Two Cues and Current Task / Review & follow-through

03 Leave the disagreement between adults with adults

Leave any staff disagreement with the staff.

Context distinction actually confirmed

Adult mismatch still unresolved

Message the child should not carry

04 Keep a corrected note with a clear status

Update the learner's note with its confirmed status.

Current instruction confirmed

Old note corrected or kept in its context
