Check the Assignment Before Calling AI Help Acceptable - working notes

One situation. Clear facts. An honest next step.

Read the current assignment and school guidance, identify the exact proposed assistance and ask the teacher when permission or disclosure is unclear. Preserve the child's own learning and honest authorship.

Hypothetical example: A parent notices that a generated paragraph exceeds the child's understanding and asks the teacher about suitable help instead of polishing it into a misleading submission.

01 Name the proposed help precisely

Identify exactly what assistance is proposed.

Task described without student identifiers

Proposed assistance

Learning purpose to retain

02 Read the current instruction

Read the current assignment, school and access requirements.

Current instruction

Account or privacy requirement

Unclear permission question

Check the Assignment Before Calling AI Help Acceptable - working notes / Review & follow-through

03 Keep authorship visible

Clarify permission and acknowledgment with the responsible teacher.

Teacher answer received

Acknowledgment required

Claims to check

04 Resolve the actual submission decision

Check understanding and resolve the actual submission honestly.

Child's explanation of the work

Correction or next teaching step

Submission decision
