Conflicting Permission Repair Sheet

Two adult replies need one adult-owned correction.

Compare the actual permissions before assigning blame for the mismatch.

Hypothetical example: one parent approves a visit before checking the ride; both parents compare the replies, acknowledge the early yes, confirm a shorter visit, and correct the pickup message together.

01 Actual replies

Use the same request when comparing answers.

Request and conditions supplied

First adult's actual reply

Second adult's actual reply

02 Adult decision

Keep the adult check with its owner.

Missing permission or practical fact

Adults confirming the final answer

Time the child will hear the decision

Conflicting Permission Repair Sheet / Review & follow-through

03 Reliance and repair

Account for what the first answer set in motion.

Plan the child already made

Adult step to acknowledge

Outside message and person correcting it

04 Confirmed path

Make the next permission request usable.
