Try the Whole Costume Before the Evening Outing - working notes

One situation. Clear facts. An honest next step.

Check the full costume on the child before the outing: it should fit without dragging, allow clear vision and use suitable visibility measures. Follow current product and local safety guidance, and keep adult supervision and route decisions in place.

Hypothetical example: A mask slips over the child's eyes when they turn. The family leaves it at home and keeps the confirmed supervision plan.

01 Check what the child will actually wear

Try all actual costume pieces together before departure.

Costume pieces checked

Actual movement problem

Instruction or safety question

02 Fix the fit problem instead of assigning the child a warning

Correct dragging fabric, obstructed vision or unsuitable fit.

Fit correction

Vision or ventilation concern

Alternative or omitted piece

Try the Whole Costume Before the Evening Outing - working notes / Review & follow-through

03 Plan visibility without treating it as traffic protection

Check appropriate visibility measures and their limits.

Visibility measure

Product check

Separate traffic or route question

04 Decide what stays home before the group leaves

Decide which pieces stay home and confirm separate supervision.

Final costume decision

Responsible supervising adult

Unresolved item before departure
