A Shared Room Is Not Automatically a Livestream Set - working notes

One situation. Clear facts. An honest next step.

Pause the proposed stream until the responsible adult has checked current platform eligibility, audience and household privacy. Other people's presence in a shared room is not permission to broadcast them.

Hypothetical example: A family declines a livestream from a room others need to use and keeps the hobby project offline. No account is created or eligibility rule bypassed.

01 Understand what the child wants to do

Understand the exact proposed activity before considering permission.

Proposed activity

Who would see or respond

Suitability question

02 Check eligibility and actual audience

Check current eligibility, audience and interaction controls.

Current rules checked

Audience controls understood

Unresolved access issue

A Shared Room Is Not Automatically a Livestream Set - working notes / Review & follow-through

03 Respect the people who share the room

Consider shared-room exposure and other people's wishes.

Background exposure categories

Other people affected

Offline alternative

04 Make stopping possible

Decide, including no stream, and identify adult help and stopping arrangements.
