Shared Drill Error Review

Check the instruction the whole group received.

A repeated group error deserves a review of the shared setup and wording before adults declare an attitude problem.

Example: athletes describe two different finishes. The lead coach confirms one instruction, corrects the marker, and observes that feature in the next approved attempt.

01 Describe the shared error

Write the sequence you actually saw.

Drill and intended objective

Repeated action observed

Current instruction given

Immediate program response required

02 Check the learner view

Examine the actual setup.

Marker or demonstration visible

Athlete task explanation

Conflicting staff direction

Observation limits

Shared Drill Error Review / Review & follow-through

03 Approve one adjustment

Keep the lead coach responsible.

Feature to clarify

Reason for the adjustment

Lead coach confirmation

Current instruction to share

04 Review the next attempt

Observe the feature being taught.

Suitable next opportunity

Assigned feature observed

Understanding still unclear

Next staff teaching decision
