Cutting Board Care and Condition Record

Return the board only after its care is complete.

Storage is the last step, not proof of the earlier work.

Hypothetical example: an adult checks a board's material, follows its care directions, spots a deep hard-to-clean groove and keeps it out of the ready stack.

01 Identify the board

Identify the used board and its actual care instructions.

Board and material

Food preparation use

Manufacturer care source

02 Carry out the care

Record cleaning and any appropriate sanitizing method.

Washing and rinsing method

Appropriate sanitizing source or not required

Adult handling the product and directions

Cutting Board Care and Condition Record / Review & follow-through

03 Check the surface

Inspect wear and assign an unresolved condition decision.

Wear or damage observed

Unresolved care question

Adult deciding return or replacement

04 Complete the return

Confirm drying, return or removal from use.

Drying method completed

Ready location or removal action

Next person given actual status
