Shared Photo Keep and Permission Record

A tidy-photo request needs an agreed deletion scope.

Ask about shared memories before removing their records.

Hypothetical example: adults select a keep set from one event folder, leave a relative's supplied images undecided, and check the actual app behavior before carrying out the specifically approved removals.

01 Define the review

Name the exact photo set and approved purpose.

Folder or album being reviewed

Purpose of the change

Scope the adults have approved

02 Ask the decision makers

Identify ownership interests and required permission.

Adults whose choices matter

Images with unclear ownership

Permission still needed

Shared Photo Keep and Permission Record / Review & follow-through

03 Choose and verify

Record the keep set and actual app behavior.

Images or groups agreed to keep

Proposed removal and undecided images

Current app behavior and retained-copy check

04 Record the authorized action

Document the approved change and leave uncertainty untouched.

Adult approval and exact scope

Actual change and retained location

Unresolved image choice and next conversation
