Recipe Equipment Readiness

Read the actual recipe and record the equipment it names.

Check the recipe's required equipment and preparation sequence before starting work that depends on a missing tool.

Hypothetical example: A family notices a recipe requires an unavailable tool and chooses a suitable different recipe before assigning preparation.

01 Read past the ingredient list

Read the actual recipe and record the equipment it names.

Recipe chosen

Recipe source

Equipment named

First dependent step

02 Check what is available

Check the available tools and their current instructions.

Tool available

Tool instruction checked

Missing item

Question unresolved

Recipe Equipment Readiness / Review & follow-through

03 Resolve the gap before starting

Resolve a missing-tool question or choose a suitable different recipe.

Adult deciding

Approved alternative recipe

Preparation handoff

Tool set out

04 Make the preparation handoff visible

Review the preparation handoff and return the tools afterward.

Meal actually made

Tool returned
