The Family Buffet Service Record

Watch the food after it reaches the table.

A buffet needs a serving adult, suitable holding and a clear ending.

Example: a host holds a second small batch appropriately, replaces the first serving dish and records the handoff instead of adding new food to an old dish.

01 Assign service

Home hosting still needs an adult in charge.

Service adult and backup

Food and first batch

Cooking or reheating check

Event requirement to confirm

02 Verify holding

Check the food and actual arrangement.

Hot or cold holding needed

Equipment and instruction check

Measured check and time

Dish with an unresolved question

The Family Buffet Service Record / Review & follow-through

03 Rotate and time

Replace dishes rather than topping them up.

First dish service time

Next batch holding place

Replacement adult and time

Room-temperature limit to follow

04 End the buffet

Finish the food decision before take-home offers.

Actual dish removal time

Leftover guidance used

Remaining food decision

Backup handoff to improve
