Local Recycling Item Decision

The local collection rule decides the destination.

A symbol identifies information; acceptance still needs checking.

Hypothetical example: adults check a recurring plastic package against their current provider list and assign its confirmed preparation and destination.

01 Identify the item

Identify one recurring item and its actual material.

Item, material and condition

Mixed part or residue to check

Recurring household confusion

02 Read the local rule

Find the current rule for the household's collection program.

Actual program and address coverage

Official rule source and date

Accepted, excluded or unresolved answer

Local Recycling Item Decision / Review & follow-through

03 Assign the destination

Assign the required preparation and destination.

Required preparation

Confirmed curbside or separate route

Responsible adult and time

04 Confirm the finish

Record completion and a trigger for reviewing the rule.

Actual destination completion

Short instruction for the household

Rule or material change to review
