Household Quote Scope and Validity Check

A saved price needs its actual scope and current terms.

Keep a proposed price separate from a confirmed purchase.

Hypothetical example: the adult finds that an old supply quote describes a different quantity, asks for current delivery terms, and saves the revised proposal before the household decides.

01 Identify the proposal

Match the quote to the exact household purchase.

Seller and quote reference

Item, model or service

Quantity and quoted date

02 Check validity

Read the stated deadline or ask whether terms remain current.

Stated validity or not stated

Known seller contact route

Current-version question and response

Household Quote Scope and Validity Check / Review & follow-through

03 Read the scope

Record included charges and unresolved conditions.

Included items and quantities

Stated charges and total

Excluded or unknown charge

04 Confirm the decision

Keep household approval and seller confirmation distinct.

Authorized adult and household choice

Exact current version and seller response

Remaining condition and private record location
