Mobile-Payment Destination Review

Agreeing the amount does not identify the account

Verify the actual person before the money leaves the app.

Hypothetical example: An adult confirms a friend's payment destination through an established contact before submitting the agreed reimbursement.

01 Pause before the final send

Identify the intended payment and the known person.

Purpose and agreed amount record

Intended recipient

Reason the destination needs review

02 Confirm the person through an independent route

Independently verify the recipient and any unexpected request.

Known contact route used

Recipient confirmation result

Unexpected request resolved

Mobile-Payment Destination Review / Review & follow-through

03 Review the actual payment details together

Review the actual app details before submission.

App destination checked

Amount and funding reviewed

Current term or fee question

04 Record what happened and act on a real problem

Retain the observed transaction status and resolve a real problem promptly.

Provider status actually observed

Private confirmation location

Unresolved payment or reporting action
