Recipe Substitution Label Handoff

Record the recipe and exact ingredient being replaced.

A familiar recipe name does not verify a replacement ingredient; check the actual package and existing allergy instructions before using it.

Hypothetical example: A replacement sauce is proposed, the current package is checked, and an unresolved ingredient question remains on hold with the responsible adult.

01 Name the substitution precisely

Record the recipe and exact ingredient being replaced.

Recipe

Original ingredient

Replacement package

Label checked on date

02 Read the current label

Read the replacement's current ingredient and allergen information.

Ingredient wording checked

Allergen wording checked

Existing household instruction

Unanswered question

Recipe Substitution Label Handoff / Review & follow-through

03 Leave uncertainty with the right decision maker

Take unresolved suitability questions to the responsible adult or care source.

Responsible adult

Manufacturer question if needed

Decision confirmed

Ingredient actually chosen

04 Complete the serving handoff

Record the approved decision and preserve the handoff before serving.

Recipe change recorded

Package kept available

Serving adult informed
