The Household Default Builder

Give one repeated question a known answer.

A useful default has agreement, current information, an exception trigger, and a review date.

Example: Tuesday practice has an agreed driver and meal. A work conflict triggers a message by Monday evening, and the family names a new driver before relying on the usual plan.

01 Find the repeat choice

Choose one practical source of friction.

Question repeatedly reopened

Information usually missing

People affected

Duty this choice must serve

02 Agree on the default

Write the ordinary starting answer.

Default answer

Person carrying the duty

Time and resource required

Where family checks the plan

The Household Default Builder / Review & follow-through

03 Define exceptions

Make a change easy to communicate.

Exception trigger

Who sends the change

Latest useful notice time

Backup answer or contact

04 Keep it current

Check whether the agreement still fits.
