Success Account and Forwarding Decision

Your encouragement should not add certainty the evidence does not have.

A reported result, an explanation of its cause and a recommendation need separate support.

Hypothetical example: a parent finds that a success post does not support its causal promise and declines to forward it as tested guidance.

01 Read the account rather than the headline

Read and identify the actual original account.

Original account and speaker

Result actually claimed

Date or essential detail missing

02 Separate the result from the explanation

Separate the result from the claimed cause.

Result evidence actually available

Cause the account suggests

General promise the evidence does not establish

Success Account and Forwarding Decision / Review & follow-through

03 Look for the context that changes the endorsement

Check relevant evidence and exposed commercial context.

Appropriate primary source checked

Commercial context exposed or unknown

Claim still unverified

04 Choose honest attribution or decline the forward

Choose an honest forwarding or correction decision.

Limited attribution or decision not to forward

Intended audience and sharing permission

Earlier endorsement requiring correction
